

Cribbing blocks are used for stabilization of an object or to support in lifting objects during rescue operations. The unique interlocking and stacking design provides several advantages as it allows creating any stabilization structure or pillars fast and with ease.

EASY CARRYING

EASY TO USE

- **Versatile:** create any structure and continuous blocking due to micro adjustment
- **Rapid and easy to use:** interlocking, stackable and low weight
- **High strength:** 20 to 60 tons (100 kg/cm²) load capacity
- **Safe:** Splinter free and slide resistant
- **High durability :** resistant to absorption of fluids
- **More height:** ideal for stabilization of SUV
- **Connectors:** blocks can be connected sideways to create platforms. Ideal for creating a lifting surface.

HIGH LOAD CAPACITY
